Whomsoever it may concern,

Subject: Tesla Roadster HID lamps type approval and headlamp cleaning device

Dear Sir/ Madam,

This is to certify that the High Intensity Discharge (HID) lamps installed on the Tesla Roadster vehicles have been included under the EU WVTA # e4*KS07/46*0001*03 Rev 02 dated 18th January 2012 .

The HID lamps are approved under E4-48R-030170 Rev 03 also dated 18th January 2012 and carries the marking E1-003381/E1- 003382 (LHD/ RHD).

The dipped beam objective luminous flux of the Tesla Roadster HID lamp is less than 2000 lumens and hence does not require to be installed with any type of headlamp cleaning device(s)

If you need additional information, please feel free to contact our office directly or through one of our local sales offices.

Sincerely,
